

Fellowship of the American Society of Neuroimaging (FASN)

Fellowship in the American Society of Neuroimaging (FASN) is meant to recognize individuals who have made significant contributions to the field of neuroimaging and have impacted the growth and practice of neuroimaging at a regional and national level.

Criteria to hold the title of Fellow of the American Society of Neuroimaging (FASN):

- Active membership in the ASN for at least five years immediately prior to application.
- Attended at least three ASN Annual Meetings.
- Be licensed (if license available) to practice in a healthcare category in the U.S. or Canada. If you are applying as a physician member, then you must be U.S. board certified.
- Have current active subspecialty certification in Neuroimaging (UCNS) or Neurosonology (ASN).
- A minimum of five years of medical practice after completion of training is required to meet the leadership criteria set by the ASN.
- Demonstrate a collaborative model of neuroimaging, in which the efforts of several disciplines are coordinated to provide optimal patient care.
- Have made significant contributions to the perception, delivery, or independent interpretation of imaging in neurosciences, in the areas of Program Development, Scholarly Contributions and Leadership.
- Program Development will consist of: 1- clinical and administrative development with strategies to support independent interpretation of neuroimaging by neurologists, neurosurgeons, emergency or critical care physicians, which should be linked to neuroimaging billing, 2- academic development with creation/sustaining of a fellowship/clerkship in the neuroimaging, lecture series on neuroimaging, or application of mandatory/elective rotations in neuroimaging from other fellowships/residencies, OR 3- research development with funded research in neuroimaging.

- Scholarly Contributions will consist of at least five publications in PubMed, applicant may be an author of any rank with main topic being neuroimaging-focused.
- Leadership will be substantiated by individuals who participated as teaching faculty to at least two ASN Annual Meetings, hold the position of Chief of Division or Chair of Department, hold the position of Director of a seminar or lecture series dedicated to neuroimaging at their own institution, or Program Director of UCNS-accredited fellowship program in neuroimaging.
- Be sponsored by two individuals, at least one of whom is an active FASN, who can substantiate the professional history and outstanding merit of the applicant, with particular emphasis on areas of demonstrated excellence and leadership in a collaborative model of neuroimaging, (Individuals in the ASN executive committee/board of directors may serve in lieu of active FASN for the first round of FASN certifications).
- A minimum of five years of medical practice after completion of training is required to meet the leadership criteria set by the ASN.
